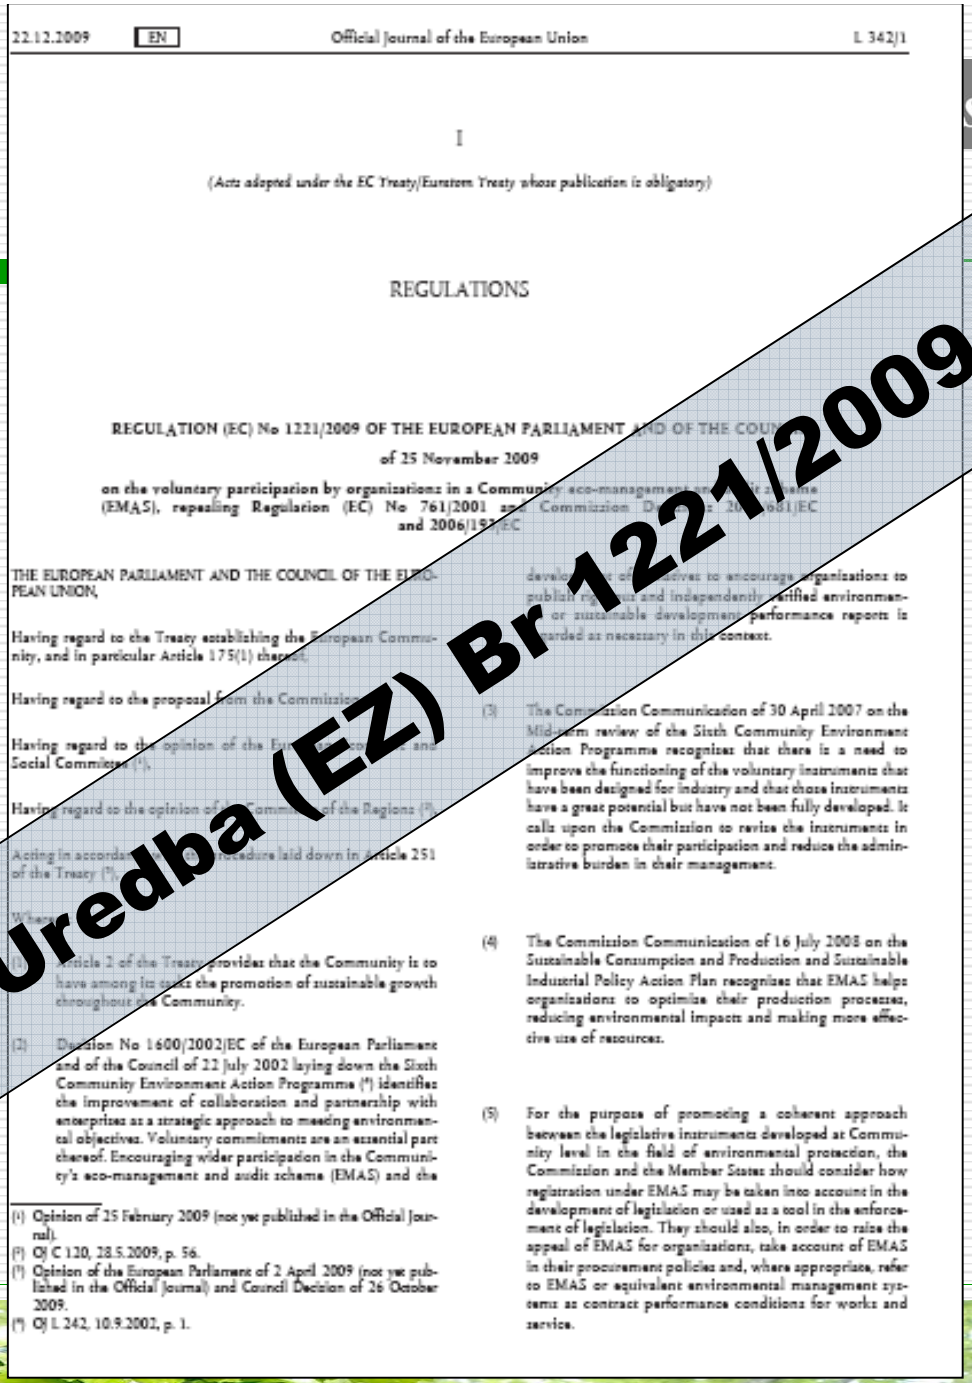
EMAS

EMAS III



22.12.2009 EN Official Journal of the European Union L 342/1

I

(Acts adopted under the EC Treaty/Euratom Treaty whose publication is obligatory)

REGULATIONS

REGULATION (EC) No 1221/2009 OF THE EUROPEAN PARLIAMENT AND OF THE COUN

of 25 November 2009

on the voluntary participation by organizations in a Community eco-management and audit scheme (EMAS), repealing Regulation (EC) No 761/2001 and Commission Decisions 2001/681/EC and 2006/193/EC

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 175(1) thereof,

Having regard to the proposal from the Commission,

Having regard to the opinion of the European Economic and Social Committee (1),

Having regard to the opinion of the Committee of the Regions (2),

Acting in accordance with the procedure laid down in Article 251 of the Treaty (3),

Whereas:

(1) Article 2 of the Treaty provides that the Community is to have among its tasks the promotion of sustainable growth throughout the Community.

(2) Decision No 1600/2002/EC of the European Parliament and of the Council of 22 July 2002 laying down the Sixth Community Environment Action Programme (4) identifies the improvement of collaboration and partnership with enterprises as a strategic approach to meeting environmental objectives. Voluntary commitments are an essential part thereof. Encouraging wider participation in the Community's eco-management and audit scheme (EMAS) and the development of incentives to encourage organizations to publish regular and independently verified environmental or sustainable development performance reports is regarded as necessary in this context.

(3) The Commission Communication of 30 April 2007 on the Mid-term review of the Sixth Community Environment Action Programme recognizes that there is a need to improve the functioning of the voluntary instruments that have been designed for industry and that those instruments have a great potential but have not been fully developed. It calls upon the Commission to revise the instruments in order to promote their participation and reduce the administrative burden in their management.

(4) The Commission Communication of 16 July 2008 on the Sustainable Consumption and Production and Sustainable Industrial Policy Action Plan recognizes that EMAS helps organizations to optimise their production processes, reducing environmental impacts and making more effective use of resources.

(5) For the purpose of promoting a coherent approach between the legislative instruments developed at Community level in the field of environmental protection, the Commission and the Member States should consider how registration under EMAS may be taken into account in the development of legislation or used as a tool in the enforcement of legislation. They should also, in order to raise the appeal of EMAS for organizations, take account of EMAS in their procurement policies and, where appropriate, refer to EMAS or equivalent environmental management systems as contract performance conditions for works and service.

(1) Opinion of 25 February 2009 (not yet published in the Official Journal).
(2) OJ C 120, 28.5.2009, p. 56.
(3) Opinion of the European Parliament of 2 April 2009 (not yet published in the Official Journal) and Council Decision of 26 October 2009.
(4) OJ L 242, 10.9.2002, p. 1.

Green Public Procurement

Welcome to EMAS!

Interest in the environmental performance of organisations is continually increasing. Taking a proactive approach to environmental challenges is now the hallmark of successful organisations.

The EU Eco-Management and Audit Scheme (EMAS) is a management instrument developed by the European Commission for companies and other organisations to evaluate, report, and improve their environmental performance. EMAS is open to every type of organisation eager to improve its environmental performance. It spans all economic and service sectors and is applicable worldwide.

Currently, more than 4,500 organisations and approximately 8,150 sites are EMAS registered worldwide. Among them are many multinational enterprises and smaller companies as well as public authorities.

Uključivanje zaposlenih

Izveštavanje – ali stvarno

- (C)SR nije isto što i filantropija
- CSR izveštaj nije spisak donacija i sponzorstava
- Važan je kontekst organizacije
- Kredibilan izveštaj – ne puki promo materijal

Ključni EPI

- **Energetska efikasnost** (*MWh, GJ/godišnje, udeo energije iz obnovljivih izvora)*
- Efikasnost korišćenja materijalnih resursa (t/godišnje)
- Voda (ukupna potrošnja, m3/godišnje)
- Otpad (ukupan otpad, opasan otpad, t/godišnje)
- Biodiverzitet (korišćenje zemljišta, m2)
- Emisije (emisija gasova staklene bašte, t CO2/godišnje)

- Svaki EPI: 3 elementa:

- A – Ulazi, B – Izlazi, C - Njihov odnos (A/B)

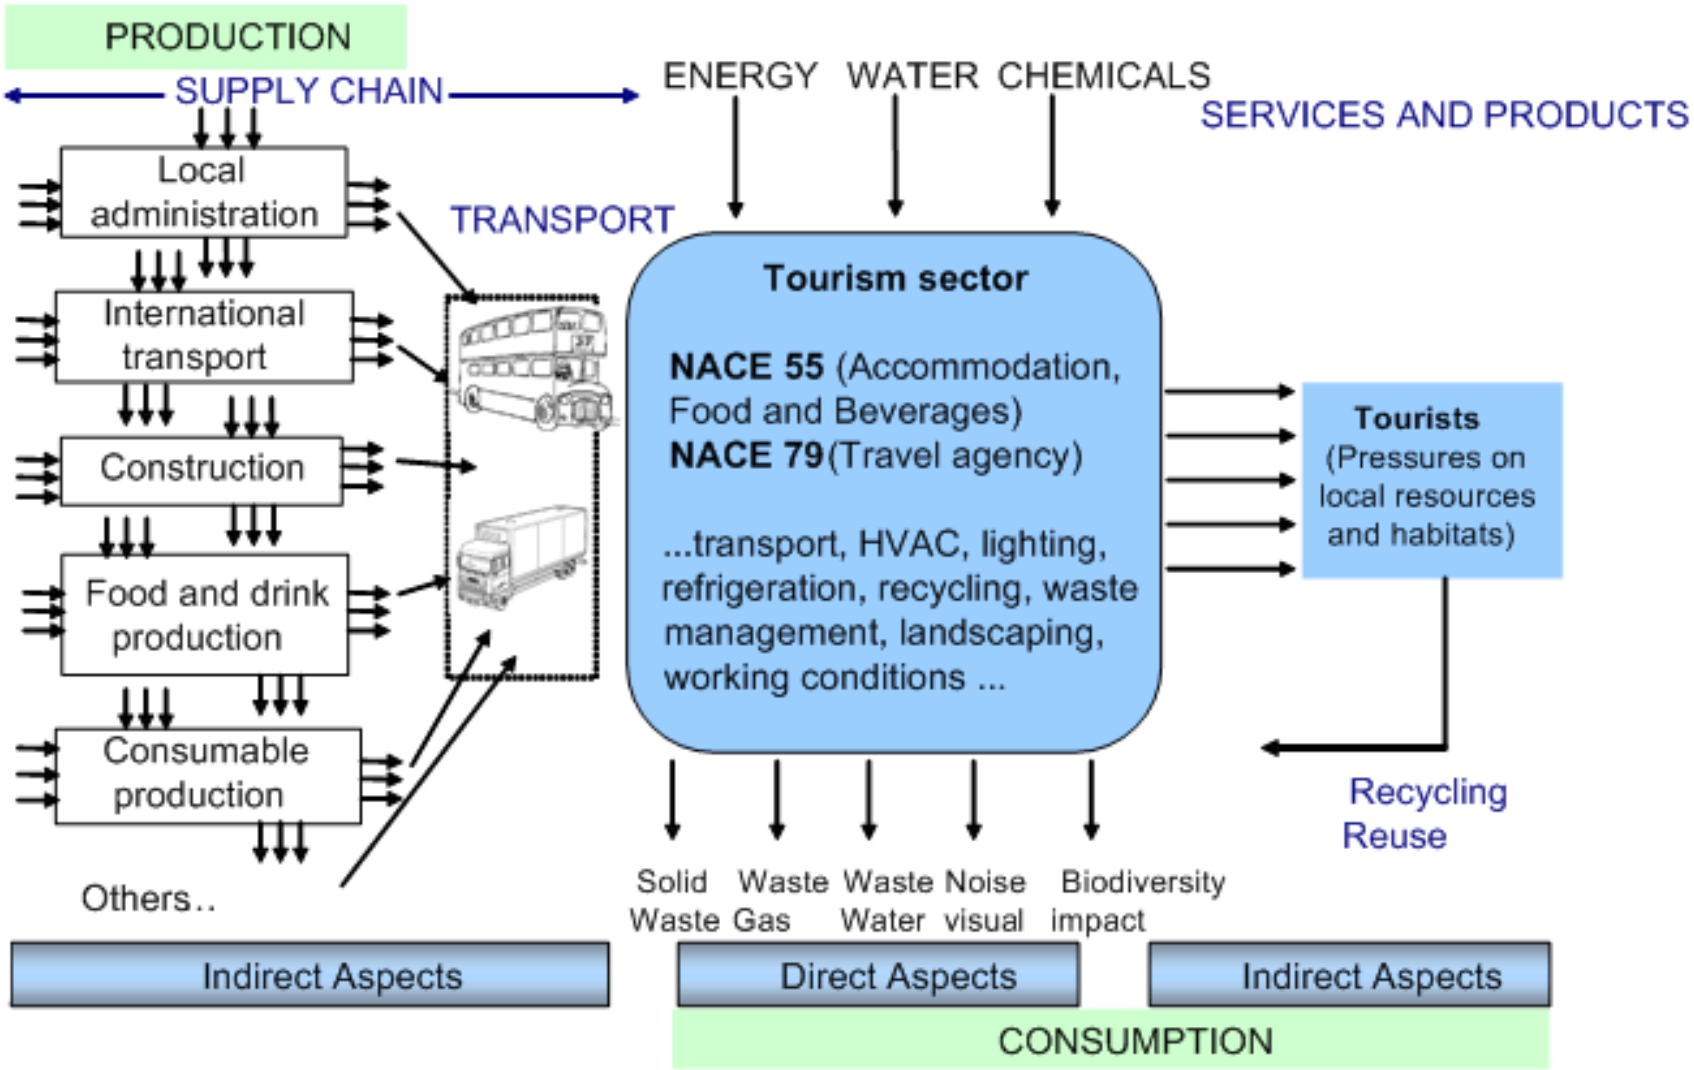
Poštovanje propisa, benčmarking

- Usklađenost sa odgovarajućim zakonskim propisima – zahtev u EMAS

Benčmarking:

- Sektorske smernice
- Propisi EU
- Izjave o zaštiti životne sredine

BASIC MATERIAL FLOW



Koristi od EMAS, hoteli

- Dodatna atraktivnost hotela za turiste
- Ušteda resursa
- Kredibilnost (EMAS prepoznat od strane države, kredibilno izveštavanje, itd).
- Praćenje i merenje, EPI, benčmarking
- Indirektni aspekti...
