OUR QUALITY, ENVIRONMENTAL AND SOCIAL RESPONSIBILITY POLICY

QUALITY, ENVIRONMENTAL AND SOCIAL RESPONSIBILITY POLICY

•Our main goal is to satisfy demands of our clients and to exceed their expectations – profit comes as final result of this. Gients' success is our success.

Mission

Environmental protection, in financial profitable manner. Reduction of adverse environmental impacts, compliance with legal and other relevant requirements concerning environmental protection and improvement of environmental performance of our clients' and also our business, in a profitable, rational manner. Continual work on our indirect, positive environmental impacts through raising environmental and social responsibility awareness.

System – but for real! Introduction, implementing and maintaining a management system in a way that produce real benefit of our clients' and also our business.

To make the world a tiny bit better. Contribution to improvement of complying to general interests of community – by providing services which promote the principles of socially responsibility, environmental protection and sustainable development.

Vision

The leading company for providing services in the area of environmental protection, sustainable development, management systems and chemical management in Serbia, that stands out for excellence of provided services and that is recommended by satisfied clients, and which is also recognized as reliable partner for the companies all around the World.

Victoria Consulting is determined to consistently comply to and permanently improve quality and environmental management system, in accordance with relevant ISO 9001, ISO 14001 standard requirements, involving all employees.

We try to fully understand our clients' needs and to meet and exceed their expectations while providing our services. Our goal is to provide services that will bring real benefits for our clients.

In our everyday work, we consistently follow all legal regulations relating to our business in our everyday work. We also take care of our direct and indirect environmental impacts, which are best reflected through the impact we make on our clients' business and raising awareness in the fields of environmental protection and sustainable development. Accordingly, we have identified our significant environment aspects and we are setting relevant objectives.

We always have in mind that, through our work, we prevent and reduce negative environmental impacts as much as possible – through careful planning and improvement of established processes and implementation of services, minimization of waste, saving of material resources and energy.

We are determined to improve all of our performances each day and in every sense.

Through continual improvement and increase of effectiveness and efficiency of established processes, we are ensuring that our clients' demands are met and their satisfaction with our services is continually improving.

Our employees are our most valuable resource and we are paying special attention to their training and professional improvement. We are encouraging team work and embracing suggestions from our employees.

To achieve a continual systematic improvement concerning all of the questions of quality, environment, sustainable development and improvement of our services, we are setting annual objectives, identify relevant risk and opportunities and corresponding measures and following their realization. We are guiding ourselves by social responsibility principles, when determining our goals and conducting all activities and considering also relevant stakeholders needs and expectations. Top management continually revise fulfillment of objectives and functioning of entire integrated management system.

Consistent compliance to this policy is responsibility of top management of Victoria Consulting.
